How to use it in class

- 1 Open it**
Open myminicat.com/teachers/ on the board, or share the link or the QR code on the handout. Nothing to install and no log-in.
- 2 Show it together**
Do the first lesson on the board as a class: the times tables and Add & Subtract lessons start with pictures (groups, arrays, ten frames) before numbers.
- 3 Practise on any device**
Children practise at their own pace on tablets, Chromebooks or computers. There are no timers and no mean fails, only stars.
- 4 Celebrate**
Print the diplomas or a printable certificate and put them on a class “Diploma wall”.

Weekly class challenge

- 1 Monday**
Pick the table (or Add & Subtract step) of the week. Follow the guided path: $2\times, 5\times, 10\times \rightarrow 4\times, 8\times \rightarrow 3\times, 6\times, 9\times \rightarrow 7\times \rightarrow 11\times, 12\times$.
- 2 Mon–Thu**
Five minutes a day: lesson first, then practice. On shared devices, switch on “Practice any (free pick)” so every child can open the table of the week.
- 3 Friday**
Star quiz, a tiny story problem, then “My diploma!”. Children can add their first name on the diploma (optional, it never leaves the device) and print it or save it as a picture.
- 4 Every week**
Add the diplomas to the class wall. When a child has every table, the master diploma unlocks. Use the printable reward chart to track the class challenge.
